

A pie chart illustrating the distribution of 1000 species across 12 orders. The chart is divided into 12 segments of varying sizes, each representing a different order. The largest segment is white and labeled 'Chir'. Other prominent segments include 'Scia' (light blue), 'Phor' (pink), 'Ceci' (light green), 'Myce' (purple), and 'Musc' (yellow). Smaller segments are labeled 'Empi', 'Cera', 'Psyc', and 'Aves'. The chart uses a variety of colors to distinguish between the orders, with some colors repeated for different orders (e.g., light blue for 'Scia' and 'Aves').
